

### **1050×1050 Presswood Pallet**

We design and produce the 1050×1050 Presswood Pallet for more than 6 years. It is a good alternative for the traditional wood pallet, it can save your budget, stock space and shipping cost by choosing the 1050×1050 Presswood Pallet. Most of our products are export to European, American, Asian countries and we look for long term partners in all countries in all areas.

### **Product Introduction**

Innovation, excellent and reliability are the core values of our business. These principles today extra than ever form the basis of our success as an internationally active mid-size company for Special Design for China Goods Food HDPE/PP Durable Neatable Heavy Duty Euro Plastic Pallets, Any interest, remember to really feel absolutely free to make contact with us. We're hunting forward to forming prosperous small business relationships with new consumers within the environment while in the in the vicinity of long term. Special Design for China Wood Plastic Composite Pallet, Equipment for Plastic Pallet, Wide selection and fast delivery for you personally! Our philosophy: Good quality, great service, keep improving. We are looking forward that more and more oversea friends join in our family for further development near the future

### **Wholesale 1050×1050 Presswood Pallet from our Factory in China**

#### **Product Introduction of 1050×1050 Presswood Pallet**

The full name of 1050×1050 Presswood Pallet is plant fiber molded flat industrial pallet. The raw materials used for the pallet are wood shavings, plant stalks, etc. It is an integral structure, and the panel and 9 supporting feet are molded at one time. The surface of the pallet board is flat and smooth, which can meet the transportation of various goods, and the lower surface is equipped with reinforcing ribs. The horizontal and vertical force of the board is balanced, and the nine-leg distribution can meet the four-way insertion of the forklift. It is a flat four-way fork-in single-sided pallet.

### **Specification of 1050×1050 Presswood Pallet**

#### **Features of 1050×1050 Presswood Pallet**

**Free Fumigation:** The pallet is made from wood shavings under high heat and pressure, it is fumigation free with reference to ISPM15

**Water Proof:** High quality and Eco Glue is used during production, making the pallet stable and water-proof

**One Step Molding:** It is one step molding, smooth surface and no nails.

**Light Weight and Durable:** One 1050×1050 Presswood Pallet are only about 18kg, but the loading capacity is 6 tons. And it can recycle use.

**Nestable:** There are nine feet block on each pallet and make it nestable, it can save the storage space and load more quantity in the container.

**No nail and screw:** All the surface of the pallet is smooth, no need to worry it would break the packing bags

**Customized design:** We can produce the mold according to your requirement and make any size as required. (There would be certain new mold fee)

### How to make the 1050×1050 Presswood Pallet

First the wasted wood was put into the chipping machine and chip it to fine wood chips. The fine wood chips are dried by a dryer, then mixed with thermosetting resin, and placed in a press for compression molding. The entire production process is carried out under high temperature and high pressure to kill any insects and fungi remaining in the wood. At the same time, due to the high density of the wood products produced, it can prevent any other insects from reproducing and re-invading. This kind of molded product is "artificial wooden packaging material" instead of the traditional "solid wood packaging material". Its products no longer need to be treated with insects, and there are no live insects in the products. It meets ISPM15 (International Standard for Phytosanitary Measures 15). The demand for exporting wood packaging products, and after various service life cycle fatigue tests, can be shipped with the goods to other countries without any special treatment.

**Attentions stock and use of the 1050×1050 Presswood Pallet**

It is strictly forbidden to overload use. It is strictly forbidden to carry high-temperature items. It is strictly forbidden to place it in the open air for a long time. It is forbidden to place the load evenly, and it is forbidden to place it unevenly. When it is not used for a long time, it should be placed in a ventilated and dry place.
